Allergy expertise Allergies in best hands

Dedicated to allergology

For more than half a century, we have been researching in close cooperation with physicians as well as scientists to develop solutions for allergy patients – from diagnostics to allergen immunotherapy (AIT). With our long-standing expertise, scientific excellence and entrepreneurial responsibility, we give our all to provide therapy options to physicians and enable allergy sufferers to lead a more fulfilled life. Driven by this mission since 1969, step by step we get closer to achieving our great vision: to cure allergies.

For more freedom in life

Real-World Evidence of AIT

Real-World Evidence (RWE) provides comprehensive information about the use of therapeutics and their **patient benefits in everyday practice**. Allergopharma sponsored **ReWARD** (Real World Evidence in Allergy Research and Development): a series of RWE studies about **mite and pollen AIT** to bring light to key medical topics such as adherence and effectiveness.

Inauguration of biopharmaceutical production

A new chapter in our history begins with a clear commitment to **Germany** as a **business location**. Technologically, the new **biopharmaceutical production** is a quantum leap. For patients, it means increased supply security, improvements in **product quality** and innovative therapy options. A milestone for our company's future.

2017

2019

50th anniversary

We not only stand for 50 years of scientific, medical and entrepreneurial success. We also stand for **allergy solutions in 10 countries**.

Our steadfast vision: people's health today and a **strong future together** – with a life free from allergies!

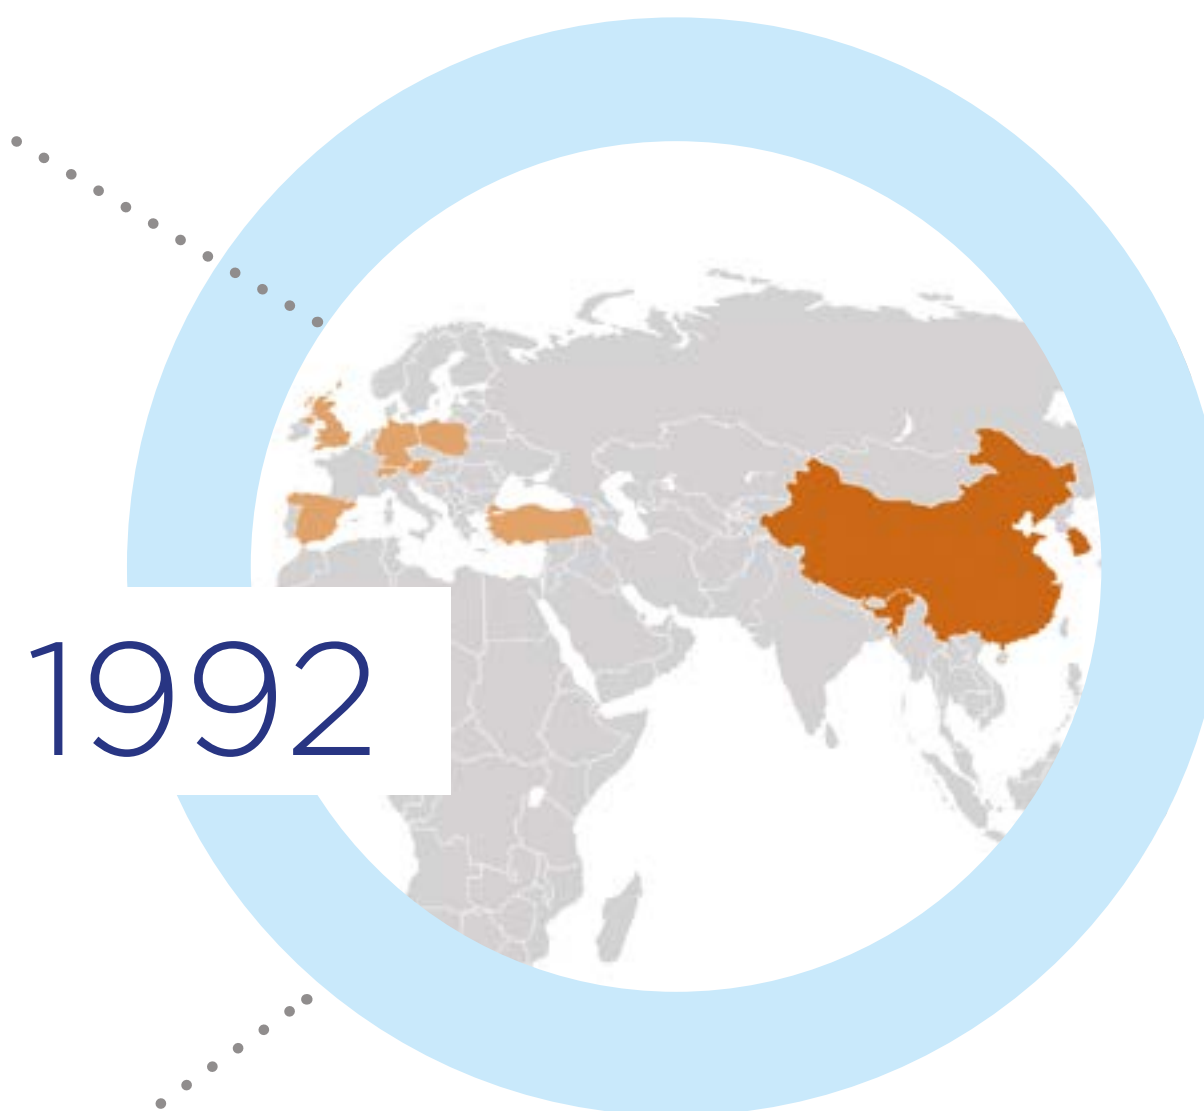

1. FASIT workshop

Understanding correlations. Researching mechanisms. Breaking new ground. In our FASIT workshops (Future of the Allergists and Specific Immunotherapy), we bring together **international allergy experts** from different areas for in-depth dialogue – to better understand allergies, thus advancing diagnosis and therapy of allergy patients.

Launch of house dust mite allergoid*

The **allergoid** expands our SCIT portfolio to help patients suffering from **house dust mite allergy**. It plays an important role in the global product portfolio.

Expansion of global business activities

Allergopharma is already a successful player in the **European market**. Now people with allergies in **Asia** can also benefit from our solutions.

* in-house development

90's

Focus on research and development

Knowledge in the field of immunology develops at breathtaking pace. Intensive in-house research dedicates all efforts to finding innovations for allergy treatment, focusing on: **T-cell and B-cell immunology** and SCIT with **recombinant allergens**.

Launch of **pollen allergoid***

Another milestone in treating allergies with AIT: the standardized **allergoid** was specially developed and manufactured by Allergopharma. The high-dosage products for subcutaneous applications broaden the treatment options for different types of **pollen allergies**.

1987

* in-house development

1972

Launch of **SCIT therapeutics***

The basis for allergy treatments is laid:

The **native therapeutic** for subcutaneous allergen immunotherapy (SCIT) is still an important product in the Allergopharma portfolio today.

1969

Foundation

Allergopharma is founded by **Joachim Ganzer** and **Dr. Kurt Herrmann** (Hermal). Soon after, the company starts conducting their own research and development.
